Lightroom makes everything about digital photography easier, faster, and more amazing — even on your iPad and iPhone. It’s your go-to app for organizing, enhancing, and sharing your images, every day.

Top features:
- Lightroom is your home base for all your photos, whether they’re from your iPhone, point and shoot camera, or DSLR.
- No matter how many edits you make, you can always revert back to your original image in just a click.
- Organize and edit photos on your desktop or mobile device. Changes sync automatically.
- Easily import photos from Photoshop Elements into Lightroom.

Photoshop gives you a complete set of professional tools for retouching, compositing, and editing down to the pixel level. It’s the app for transforming your images into anything you can imagine.

Top features:
- Make something amazing with the world’s most powerful creative imaging app.
- Combine multiple images or change the perspective of a shot to create something entirely new.
- Sharpen your skills and master new techniques with a library of easy-to-follow tutorials personalized for every level of learner.
- Edit on your iPad using Photoshop Mix, a free mobile app that lets you combine and cut out images, apply different looks, and more. Then take your work further in Photoshop on your desktop.
